However I want to be able to add the file's name to the bottom of the file in the images directory. I also want to add the file type as well. How do I add the filename? Also, the script is only working on my local server, is this because I need to run it through cron to function properly? A: Its better to use the \$_FILES Array, to upload and retrieve a file like this: //set some variables \$name = \$_FILES["file"]["name"]; \$type = \$_FILES["file"]["type"]; \$size = \$_FILES["file"]["size"]; \$tmp = \$_FILES["file"]["tmp_name"]; \$error = \$_FIL 1cb139a0ed
