

October 27, 2552 BC. - Step by step recovery of formatted damaged RAW hard drive with Recover My Files v4 data recovery software. According to Dr.Fone, Recover My Files is, in my opinion, the best tool for recovering data after formatting or deleting a partition. All you need to run this program is a Windows laptop. This application does not require installation, so you can download it here. 1. Install it on your computer. 2. Open the Recover My Files application and select the "Data Recovery" tab from the top menu.
