## License.dat Soliwork Cosmos

Specifies where the COSMOS license file is located on your computer. Recharger: This parameter specifies how many times the program should be restarted when working with NTFS. Disk: This option usually refers to the hard disk partition settings, however it can be used for any other hard disk partition as long as it is connected to the system. MPCFS: A floppy drive option, typically used to create an access control system. FileType: This method can be used to read or write files on any file system other than FAT files. EXT3G: This item indicates whether to copy, move or erase files on the disk. IDCF: This flag does not affect access to hard drives. NTContext: This argument allows you to specify what data should be displayed in the NT console. Typically this argument specifies to write files to disk. PCID: This fact shows if the PCID file is moved to another drive. This argument can be written in an attribute file, which is stored in NT files in the System and Disk folder. Identifier: This moment indicates whether the file is displayed

---

in the console or in the directory. This point can also be defined in an attribute file. Control: This mechanism shows users how to control the settings they can change in the console. This parameter can be set from the console settings section. Console: This document allows users to view the running status of the NT Control Center program.
