### What's New In NextUp Talker?

NextUp Talker is a Text To Speech application specifically designed for people who have temporarily or permanently lost their voice. With natural, human sounding voices and convenient shortcuts to quickly enter commonly used sentences and phrases, NextUp Talker allows those with vocal impairments to easily communicate with others using a windows PC or Tablet PC. Whether due to ALS, Cancer, Stroke, aphasia, or any of the other all too common problems causing loss of speech, NextUp Talker should help you regain an important part of your life by allowing you to talk with others. Our goal is to provide high-quality but affordable speech solutions for those in need. Moreover, NextUp Talker allows you to insert actual sound files along with speech. These can help make kids more comfortable talking with an adult using a computer. NextUp Talker Screenshots: NextUp Talker Reviews: Amazing app! 6 By Janet12345 I have been using this app since it was a student project of mine. I use it everyday to talk to my grand-daughter, and this app is a work of art. The voices are exactly what I was looking for and the random access is a huge plus. I highly recommend this app to anyone looking for a way to talk on the PC. Brilliant Speech synthesizer 5 By APG42 I used to have problems with my voice because of a throat infection, and the thought of talking over the phone made me feel so anxious. I had a friend who couldn't speak for a while so I started looking for a TTS program for her computer, and this is it. Easy to use and really puts the 'mower' back in 'mower-mowing'. Really easy to talk to her with this program and I can't imagine doing anything else. She now has a voice on her computer again, and I really couldn't be happier. Not perfect but very usable 5 By Abi\_d\_miss There are a few things that I would like to have improved, but overall, this is a very well done product and works really well for a novice user. Very good TTS 5 By Dilyer Very good TTS. I like how you can customize the voices, better than Siri 5 By dennisharba I'm using the Mac version and it's better than the iPhone version of Siri. Great TTS 5 By slabsford Love the added options to get specific voices. What I don't like is that the volume is kinda loud for each sentence. Other than that, great program. Needs voice-enabled on the phone side 2 By Dr.Pocket

## System Requirements:
