You can collect favorites software and make your own collection, My Favorites helps to manage it: you can add and remove favorites.This invention relates generally to data storage systems, and more particularly, to compression of data. Data storage systems are arrangements of hardware and software that include storage processors coupled to arrays of non-volatile storage devices. These storage processors service host input/output (I/O) operations received from hosts. The received I/O operations specify files or other data elements to be written to, read from, or accessed in some other way. The received I/O operations are processed by the storage processors and data elements are stored in the non-volatile storage devices. Some data storage systems may be configured in a mainframe environment and use tape drives or other media in a cartridge arrangement to provide enhanced storage features. For example, systems may receive commands from clients to perform certain operations

What's New In?
