Textbooks in the international edition are printed abroad in a lower quality than the US edition, with

different covers and different ISBNs.

In this regard, before buying a textbook, you should check on the publisher's website what exactly is included in the kit, and make sure that it really contains a textbook and application. If you are offered a "Textbook with Applications", then with a high probability you will receive another, cheaper version of the textbook. Unlike textbooks published in the US, this kit does not include a teacher's manual or handouts, which greatly reduces its price.
