KeyMACRO is a powerful macro tool that allows users to easily create complex macro recording sequences. KeyMACRO enables easy recording and playback of the same sequence of keyboard presses several times. The user can select the number of repetitions for each keyboard press by setting key macros on a dialog box. KeyMACRO can automate multiple operations, like:

- recording any key press, - displaying a text message, - opening a specific file, - sending an email, - saving the entire document and starting a new document. The macro recording feature is used for creating complex keyboard macro recording sequences. KeyMACRO runs on Windows XP/2003/Vista/7/8/10. KeyMACRO is freeware. KeyMACRO key press recording of any key press KeyMACRO is the world's most powerful tool for recording macro keyboard sequences. It's used by professional and amateur radio operators to create macros that run any sequence of keyboard presses several times. KeyMACRO allows you to record all key presses in a dialog box. You can define the type of key press (A, S, C, etc.) and the number of keyboard presses that can be run, and define the automation between each of these individual repetitions. KeyMACRO saves all the key press recordings to the clipboard and optionally you can save them to a file as a sequence of key press recordings. KeyMACRO is very easy to use. Set up your macro and start recording your keyboard sequence. You can quickly stop and save the recording and restart if you want to repeat the macro sequence. The keyboard can be scrolled with the mouse if there are a lot of key presses. KeyMACRO can monitor the Microsoft Windows system for a particular key press and start the recording sequence when this key press is recorded. The user can select a pre-defined keyboard shortcut to start the macro recording. KeyMACRO can record a key press and display the recorded text and then later replay the entire recorded text in case the need arises.

KeyMACRO allows the user to create many different macro combinations such as sending an email, writing a text, opening a specific file or opening a program. KeyMACRO can save any text in the clipboard, and if the user wants, he can save this text to
