Search for YouTube titles YTtitlescraper Crack Keygen is a simple tool, designed to acquire all the titles you would usually search for on YouTube. The only difference is that the application can also save the titles to your computer in a CSV file, that you can open at any time. It only returns the titles of the videos, it does not include URLs, number of views, author, channels or data of publishing. Instead, the list is created in the order of the videos'

appearance on the results pages. All you need to do is specify a name and path for the CSV file, then specify how many pages of results you wish the software to analyze. Search for titles by keywords YTtitlescraper requires that you specify the keywords for the title search. Just as browsing through results on the website, the top titles on the list are the most popular videos based on the keywords. The software supports connecting to the Internet via proxy servers, so if you prefer this option, you need to specify the server address and the port. Moreover, if a

password is required to access the proxy, you need to provide it as well. The search can be started, paused or resumed at any time you wish and you may easily enable CAPTCHA services, for a more powerful search. View videos on YouTube YTtitlescraper features an integrated browser function which you can use in order to navigate the Internet and even view the desired videos on YouTube. You may use the Back and Forward functions in order to browse through the most recently visited pages. All in all, YTtitlescraper is easy to use and allows

you to navigate the Internet anonymously.Did you know that the University of Louisiana at Lafayette is one of the oldest universities founded as a public institution?
