Should I cut my blue light intake? What's the blue light at night? I am the founder of Distilled Books - the family e-book store. I am also the creator of the innovative Disconnected Publishing Project which sets out to demonstrate that books can be written, designed and illustrated with a minimum of inputs from the traditional publisher and distributed as ebooks for free or discounted download. More about me and Distilled Books here: I asked in a previous post to see how many people would actually pay \$4.99 for Kindle books. The response was quite high, and I would say that this number is representative of the books that you see on Kindle. Almost all of them have a price tag, and the majority of them are over \$4.99. If you are a new reader coming to Kindle Books, you'll be surprised to find the cost of the books inside their cover. Most of these books have a price tag that is somewhere around \$9-\$10 when added to your Amazon account. On the face of it, that's really cheap! So what's the point of paying \$4.99 when I can subscribe to an unlimited number of books for only \$9 a month? The downside to the unlimited plan is that you can only read the book for that time period. If you turn it off during that time, you lose access to it and can't go back and read it. With Kindle Unlimited, you can stop reading during the month or year, and you will then be refunded the money you paid for the book. You also can't read the books that you have downloaded. I've been using Kindle Unlimited for a long time. I subscribe to over 200 books a month. I find that if I read about half of these books, I read the book in a couple of days and feel like I'm done. However, I have probably lost about \$100 in refunds. I sometimes like a book and want to finish it. I then have to wait until the end of the
