I think it's a proxy issue.I think that the problem can be bypassed by using VPN software. A: I found out that it was a proxy issue. If using any kind of security software that blocked access to the website, you can bypass this problem by disabling proxy settings in the software. If not using any security software, you can bypass it by using "private browsing" in the browser. Surface-linking engineering and its applications for interfacial catalysis. A series of ultrathin interpenetrating bilayer and multilayer films of silica and methacrylate (MA) is prepared by co-condensing alkyltrimethoxysilane (ATMS) and MA in a mixed solvent system comprising ethanol and anhydrous toluene. After reaction, the films are developed with aqueous base to produce interfacial active sites on the surface of the resultant films. The substrates are characterized by spectral analysis, electron microscopy, and powder X-ray diffraction. Oxidation of alcohols at the interface is catalyzed by alkene epoxidation, with a turnover of 5000 per site/cycle and a selectivity of >99% at 20 degrees C and 100% relative humidity. Our findings suggest that surface-linking engineering can be used to fabricate highly-active, stable, and reusable heterogeneous interfaces by directed loading of functional groups on the surface of support materials.Leaked 2009 iPhone price list The 2009 iPhone price list has been leaked. Originally published a month ago, the iPhone price list has now been verified by app developers. The file, listed as 2008b iPhone3GS_iPhoneDevices_1.0, was published to the Internet by an unknown Twitter user, @kidcore (the Twitter user is listed by the file extension only as.kidcore). The price list is said to cover 2008 Apple data for the iPhone 3GS, iPhone 4 and the iPhone 4S and BlackBerries. The list includes: You can view the entire list below. I have outlined the areas of interest, as follows: The hardware The screen resolution The type of memory used (with the exception of memory for SIM) One of the most surprising things is that the iPhone 4 was apparently planned to launch at $0.99, with the 4S planed to launch at $0.99. Unfortunately, that plan never happened 3e33713323
