pdf in pdf format.Q:
Rename a file on a Zip File
I've got a zip file that was
created by the program
named Stampede that was
used to create a document
on MS Word. The document
was then saved as a zip
and the zip was
subsequently moved to our
server. I'd like to rename
the document that is stored

inside the zip file. I've tried the following: `unzip -p` Which lists the contents of the ZipFile. Unfortunately I cannot rename the files inside the ZipFile. `unzip -i` Does not list any files inside the ZipFile. A: You probably need to add a directory when you run this, since it's likely the zip file has a directory in the root and the file you want to rename is in one of its subdirectories, e.g. "C:\User

s\User\Downloads\document
t.zip" -> "C
