It seems that this is a great piece of software and I'm already looking forward to using it on a personal project. However, as a Linux user I find it difficult to use the software because it's basically a Windows client. Would the software be able to add support for other types of remote storage solutions? A: I think StarWind iSCSI Initiator is a great software. You will find, that everything what is part of StarWind iSCSI Initiator works on Linux as well, as it uses SMB for SCSI and NFS for iSCSI. So if you use another operating system, you can use it too. 1. Field of the Invention The present invention relates to an ultra-high molecular weight polymeric

substance for use in the ink-jet printing technique and to a method of manufacturing a pattern formed by such a polymeric substance. More particularly, the invention relates to an ultra-high molecular weight polymeric substance capable of producing an extremely narrow dot and a method of manufacturing a pattern formed by this ultra-high molecular weight polymeric substance. 2. Related Background Art Ink-jet printing technique is a printing method in which printing is carried out by jetting droplets of a printing liquid or printing ink at high speed. High-speed printing is possible because ink droplets are jetted in the form of fine droplets by actuating a piezoelectric, thermal or the like printing element using a very small amount of ink. This ink-jet printing technique is used for printing images on plain paper, etc., and is attracting attention as a technique for printing on a recording medium such as paper. It is required to produce an image having a bright color such as cyan, magenta and

yellow, black, etc. To satisfy this requirement, a technique has been developed in which b7e8fdf5c8
