What's New In?

Compact software, with an easy to use graphical interface TV Tuner Capture offers a very simple and efficient way to record TV and other multimedia programs. Simply launch this application and follow the on screen prompts to connect and start recording TV programs. For the purposes of portability, this software solution is extremely light weight and can be ran from any storage media, be it a USB pendrive or a DVD. In addition, TV Tuner Capture is also equipped with the standard features of most modern multimedia recording programs, such as support for multiple audio capture devices (audio inputs), customizable parameters, timed recordings and much more. Simply choose and capture your desired content Once you start the application, it will shortly ask you for the video and audio input sources. Just select the hardware and TV tuner or other multimedia capture device you are using and start the recording process. Whatever the hardware you are using, the program will detect the device, start streaming the channels to it and record the captured stream. Simply enjoy and manage your files Once the recording is complete, you can export the files on-the-fly, in a number of accepted formats, and take them to your desktop PC for further editing. While the application comes with some built-in presets that allow you to import, edit, extract audio/video streams and perform other tasks directly from the main interface, for the more advanced users, there is the additional option of opening the captured files in multimedia editing programs, like Total Video Converter and many others. Read the latest news about the world of technology Contacts About Company Scorpiontech.pl is a portal created and supported by experts in digital media management software. We bring together the latest products and news about the world of multimedia software, helping users find the most suitable product for their needs, giving them the opportunity to try a software for free. The present invention relates to vacuum cleaner systems, and more particularly to an arrangement for automatically preventing the rotation of a vacuum cleaner brush by a cover or rug

placed on the floor being cleaned. It is common in the use of such vacuum cleaner systems to place a carpet or rug over the floor to be cleaned, to effectively prevent dirt, dust and debris picked up by the vacuum cleaner from being spilled onto the floor. Such rugs or coverings, however, have been found to interfere with the operation of the vacuum cleaner, and in many instances it is desirable to prevent the vacuum cleaner brush from being turned by
