The easiest way to

Adobe Photoshop Elements 12 includes the following features: In this guide, we'll explain how to import photos from a memory card, using a USB camera, capture pictures on a smartphone, or edit the pictures on a PC. Importing photos

You will most likely first start by importing a photo or several photos from your memory card, using a USB camera, a mobile phone or your computer. Importing photos on a smartphone

Open the Photos app on your smartphone and tap on the camera icon. Tap on the photo you want to import. The photo will be uploaded to your memory card. Managing photos on a PC Plug in your memory card on your computer and open the Windows Files Explorer. Go to the directory where the photos are stored (typically C:\Users\[user name]\My Pictures\ or on a desktop computer C:\Users\(user name)\Pictures\). or on a desktop computer). Open the photos you want to work on on the left side of the

Windows File Explorer. Select the photos you want to edit. Right-click on them and select Share. If you select Copy as you can see, you can paste them to a new folder on your memory card. To import photos from a USB camera, you'll need the manufacturers' software to manage the files on your computer. We recommend using Apple Photo Booth or FotoZilla to upload the photos. The iPhone has many built-in features that can help you. Photos will appear in the Photo app, and the app has a QR code function. After you click on the QR code, you will be prompted to scan it with Apple's Face ID or Touch ID. Select the photo you want to import and tap on "Import from iPhone" in the top-right corner. On the other hand, if you want to connect a USB camera, you will need a software that will be compatible with the camera model. Setting up a digital camera It's not the same with digital cameras. So, how do you connect a digital camera to your computer? The easiest solution is to simply plug it

into your computer. You'll find a USB port at the back of the camera. Connecting a digital camera to a computer The camera's plug-in port. Connect the USB cable on the camera. 05a79cecff

Q: Must the visible character in a token be escaped in a json Because the ÿ is not a part of the JSON spec, is there a way to modify my code so the visible character in a token is escaped when it is in a json.

```
class MyJSONParser() { // response handling
  def parserForEveryToken() { try { def jsonText = def text println jsonText if (text.contains("{")) { def jsonText = def text.substringBetween('{', '}') println jsonText jsonText.replaceAll("\\?c\\?q\\?i\\?v\\?e\\?r\\?m\\?t\\?v\\?e\\?", "\\?c\\?q\\?i\\?v\\?e\\?") println jsonText
    html = htmlBuilder.bind { errorElement "Error" msg "Receipt of empty JSON data" css "btn.btn-primary.btn-xs.btn-default.danger" status "${status}"
  }
